

The USAID FEWS NET Weather Hazards Impacts Assessment for Afghanistan June 9 - 15, 2010

During May, above-average temperatures continued throughout the lower terrain areas of southern Afghanistan. However, below average temperatures remained across the higher elevations in the northeast and in some local areas north of the Kabul region. During the next week, below-normal temperatures are expected across the central highlands and northeast mountains with above-normal temperatures in the lowlands. Maximum temperatures will likely exceed 40°C in southwest Afghanistan.

Following unseasonably late precipitation during early May, seasonal dryness returned during the past two weeks. Despite the precipitation during April and May, seasonal precipitation deficits for the wet season (October 2009 – April 2010) are significant in the northeast mountains and central highlands. Many local areas have experienced nearly half of their total normal precipitation accumulation since October. Drought conditions will continue until the next wet season which begins during the winter 2010/11.

During the next seven days, seasonal dryness can be expected. Scattered showers may occur in the northeast mountains.

Note: The Hazards assessment map is based on current weather/climate information, short and medium range weather forecasts (up to 1 week), and assesses their potential impact on crop and pasture conditions. Shaded polygons are added in areas where anomalous conditions have been observed. The boundaries of these polygons are only approximate at this continental scale. This product does not reflect long range seasonal climate forecasts or indicate current or projected food security conditions.

FEWS NET is a USAID-funded activity whose purpose is to provide objective information about food security conditions. Its views are not necessarily reflective of those of USAID or the U.S. Government. The FEWS NET weather hazards assessment process and products include participation by FEWS NET field and home offices, NOAA-CPC, USGS, USDA, NASA, and a number of other national and regional organizations in the countries concerned. Questions or comments about this product may be directed to Wassila.Thiaw@noaa.gov or 1-301-763-8000 x7566. Questions about the USAID FEWSNET activity may be directed to Gary Eilerts, USAID Program Manager for FEWSNET, 1-202-219-0500 or geilerts@usaid.gov.
