

## Climate Prediction Center's Central Asia Hazards Outlook For USAID / FEWS-NET May 28 – June 03, 2020

### Temperatures:

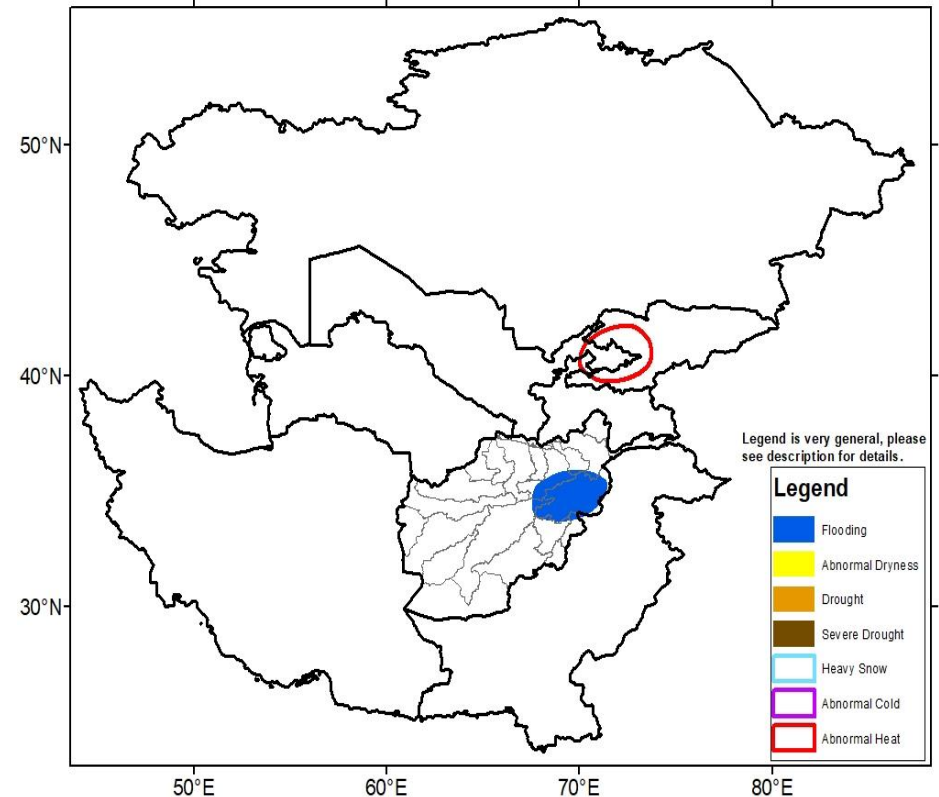

For the first time in a while, Kazakhstan has been relieved of some high temperature compared to the past several weeks. Some below-average temperature (4-6°C below maximum normal temperature) has been recorded in the far western part of the country. In contrast, the eastern part of Kazakhstan has recorded between 2-6°C above normal maximum temperature for the past seven days.

During the coming outlook period, above-average temperature is expected over the major part of Kazakhstan, the western part of Kyrgyzstan.

### Precipitation

This past seven days, moderate to heavy rainfall has been reported over northeastern part of Afghanistan which could aggravated the saturated water ground conditions in the region. Light to moderate rainfall has been registered over Tajikistan, Kyrgyzstan, and several part of Kazakhstan.

For the coming outlook period, less rain is expected over central Asia. Showers to light rainfall is expected over some part of Kyrgyzstan, Tajikistan, and the eastern part of Afghanistan. The Pakistan is expected to receive between 5 to 25mm of rainfall in the central and northern part for the coming outlook period.

**Note: The Hazards outlook map is based on current weather/climate information, short and medium range weather forecasts (up to 1 week), and assesses their potential impact on crop and pasture conditions. Shaded polygons are added in areas where anomalous conditions have been observed. The boundaries of these polygons are only approximate at this continental scale. This product does not reflect long range seasonal climate forecasts or indicate current or projected food security conditions.**

FEWS NET is a USAID-funded activity whose purpose is to provide objective information about food security conditions. Its views are not necessarily reflective of those of USAID or the U.S. Government. The FEWS NET weather hazards outlook process and products include participation by FEWS NET field and home offices, NOAA-CPC, USGS, USDA, NASA, and a number of other national and regional organizations in the countries concerned. Questions or comments about this product may be directed to Wassila.Thiaw@noaa.gov or 1-301-683-3424. Questions about the USAID FEWSNET activity may be directed to Gary Eilerts, USAID Program Manager for FEWSNET, 1-202-254-0204 or geilerts@usaid.gov.
