

## Climate Prediction Center's Central Asia Hazards Outlook For USAID / FEWS-NET 28 October – 03 November, 2021

### Temperature:

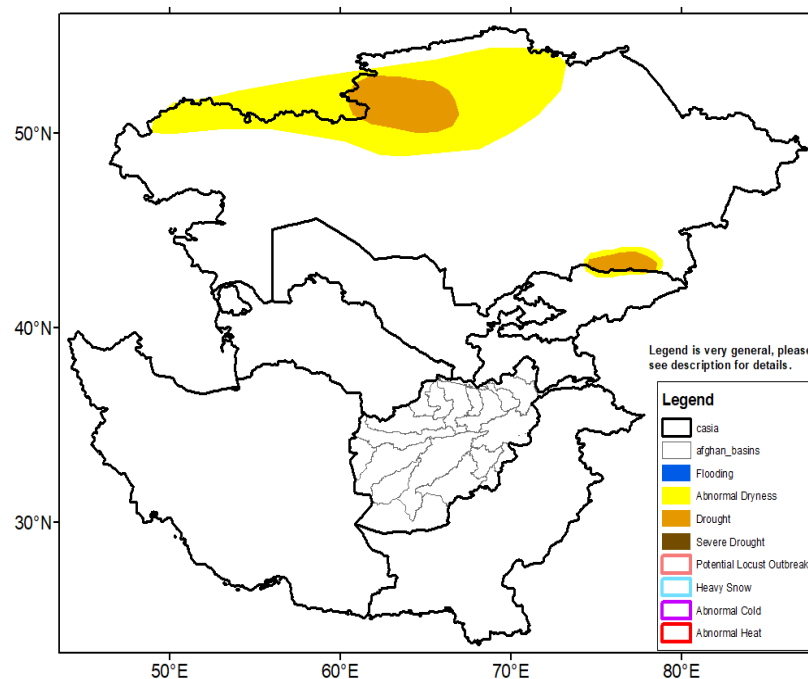

Weekly average maximum temperatures were above normal (2 to 6 °C) across northeast and northwest Kazakhstan, and northeast Afghanistan during 19 October – 25 October. In contrast, below normal mean temperatures were observed across eastern Turkmenistan, southeast Uzbekistan, and southwest Afghanistan. Weekly average minimum temperatures were observed around 0 to -10 °C across northern Kyrgyzstan, eastern Tajikistan, northeast Kazakhstan, and central Afghanistan.

The GEFS model forecasts below normal temperature across Turkmenistan, Uzbekistan, Tajikistan, Kyrgyzstan, Afghanistan, and in for northern Pakistan during 28 October – 03 November. In contrast, above normal mean temperature are forecast across northwest and eastern Kazakhstan, and southeast Pakistan. Weekly average minimum temperatures are forecast around 0 to -16 °C across Kyrgyzstan, Tajikistan, northeast Afghanistan, northern Pakistan, and northern Kazakhstan. Weekly minimum temperatures are forecast to average more than -16 °C below normal across eastern Tajikistan.

### Precipitation:

Light to moderate precipitation was observed across northern Pakistan, northeast Afghanistan, northwest and southeast Kazakhstan, western and northeast Kyrgyzstan, northeast Uzbekistan, western Tajikistan and southcentral Turkmenistan during the period 19 October – 25 October. Some greater amount of precipitation (25 mm to 75 mm) was observed across northern Pakistan and northeast Afghanistan.

The GEFS weekly ensemble mean forecasts light to moderate precipitation across northern and eastern Kazakhstan, Kyrgyzstan, Tajikistan, eastern Uzbekistan, northern Afghanistan, and northern Pakistan during 28 October – 03 November. Some greater amounts of precipitation around 10-50mm are possible in for northeast Kazakhstan.

**Note: The Hazards outlook map is based on current weather/climate information, short and medium range weather forecasts (up to 1 week), and assesses their potential impact on crop and pasture conditions. Shaded polygons are added in areas where anomalous conditions have been observed. The boundaries of these polygons are only approximate at this continental scale. This product does not reflect long range seasonal climate forecasts or indicate current or projected food security conditions.**

FEWS NET is a USAID-funded activity whose purpose is to provide objective information about food security conditions. Its views are not necessarily reflective of those of USAID or the U.S. Government. The FEWS NET weather hazards outlook process and products include participation by FEWS NET field and home offices, NOAA-CPC, USGS, USDA, NASA, and a number of other national and regional organizations in the countries concerned. Questions or comments about this product may be directed to Wassila.Thiaw@noaa.gov or 1-301-683-3424. Questions about the USAID FEWSNET activity may be directed to Gary Eilerts, USAID Program Manager for FEWSNET, 1-202-254-0204 or geilerts@usaid.gov.
