

Climate Prediction Center's Central Asia Hazards Outlook For USAID / FEWS-NET 04 November – 10 November, 2021

Temperature:

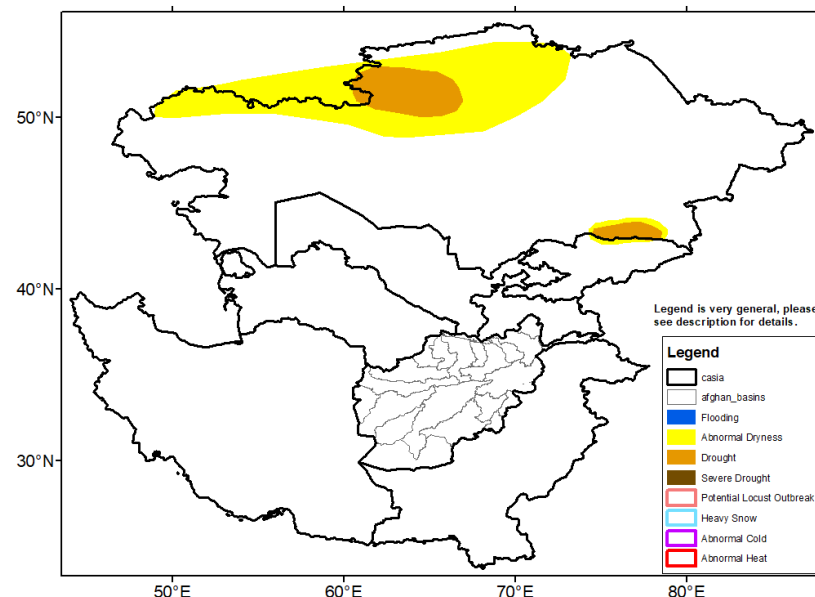

Weekly average maximum temperatures were above normal (2 to 4 °C) across eastern and in for northwest Kazakhstan, and northeast Afghanistan during 26 October – 01 November 2021. In contrast, below normal mean temperatures were observed across Turkmenistan, eastern Uzbekistan and western Tajikistan. Weekly average minimum temperatures were observed around 0 to -10 °C across northern Kyrgyzstan, eastern Tajikistan, central and northern Kazakhstan, and central and northeast Afghanistan.

The GEFS model forecasts below normal temperature across Turkmenistan, Uzbekistan, Tajikistan, Kyrgyzstan, Afghanistan, northern Pakistan, and eastern Kazakhstan during 04 November – 10 November. In contrast, above normal mean temperature are forecast across northwest Kazakhstan, and central and southern Pakistan. Weekly average minimum temperatures are forecast around 0 to -16 °C across Kyrgyzstan, Tajikistan, northeast Afghanistan, northern Pakistan, and northern and eastern Kazakhstan. Weekly minimum temperatures are forecast to average more than -20 °C below normal across eastern Tajikistan.

Precipitation:

Light precipitation was observed across northern and southeast Kazakhstan, northeast Kyrgyzstan, northeast Uzbekistan, western Turkmenistan, northern Pakistan, and northern Afghanistan during the period 26 October – 01 November.

The GEFS weekly ensemble mean forecasts light to moderate precipitation across northwest Kazakhstan, Kyrgyzstan, Tajikistan, eastern Uzbekistan, northern Afghanistan, northern Pakistan and southern Turkmenistan during 04 November – 10 November. Some greater amounts of precipitation around 10mm - 50mm are possible in for northern Afghanistan and central Tajikistan.

Note: The Hazards outlook map is based on current weather/climate information, short and medium range weather forecasts (up to 1 week), and assesses their potential impact on crop and pasture conditions. Shaded polygons are added in areas where anomalous conditions have been observed. The boundaries of these polygons are only approximate at this continental scale. This product does not reflect long range seasonal climate forecasts or indicate current or projected food security conditions.

FEWS NET is a USAID-funded activity whose purpose is to provide objective information about food security conditions. Its views are not necessarily reflective of those of USAID or the U.S. Government. The FEWS NET weather hazards outlook process and products include participation by FEWS NET field and home offices, NOAA-CPC, USGS, USDA, NASA, and a number of other national and regional organizations in the countries concerned. Questions or comments about this product may be directed to Wassila.Thiaw@noaa.gov or 1-301-683-3424. Questions about the USAID FEWSNET activity may be directed to Gary Eilerts, USAID Program Manager for FEWSNET, 1-202-254-0204 or geilerts@usaid.gov.
