

NCEP Contributions to the WMO Severe Weather Forecasting Demonstration Project (SWFDP) and to the African Monsoon Multidisciplinary Analysis (AMMA) Initiative

1. Rainfall Forecast: Valid 06Z of May 16 – 06Z of May 20, 2015. (Issued at 1630Z of May 15, 2015)

1.1. Twenty Four Hour Cumulative Rainfall Forecasts

The forecasts are expressed in terms of 75% probability of precipitation (POP) exceeded, based on the NCEP/GFS and the NCEP global ensemble forecasts system (GEFS) and expert assessment.

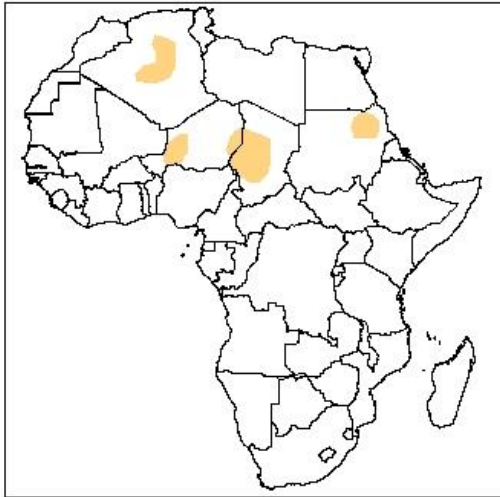

Summary

In the next five days, lower-level wind convergence over Mali, Nigeria, Car, Cameroon, Sudan, and Ethiopia, is expected to enhance rainfall in these regions. There is an increased chance for heavy rainfall over Sierra Leon, Liberia, Congo Brazzaville, Rwanda, Cameroon, Gabon, Burundi, Kenya and Ethiopia.

Atmospheric Dust Forecasts, day 1 to day 3,
Moderate Dust Concentration (MDC) and High Dust Concentration (HDC)

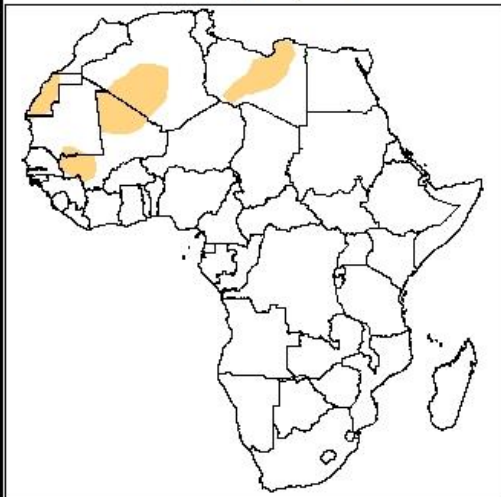

Day 1 Dust forecast
May 16, 2015

Day 2 Dust forecast
May 17, 2015

Day 3 Dust forecast
May 18, 2015

Highlights

There is an increased chance for moderate to high dust concentration over some parts of the Sahel, and North Africa countries.

Legend

MDC, Vis. < 5km

HDC, Vis. < 1km

1.2. Model Discussion: Valid from 06Z of May 16, 2015

The Azores high pressure system over the Northeast Atlantic Ocean is expected to weaken from a central pressure value of 1035hpa in 24hours to 1031hpa in 120hours, according to the GFS model.

The Arabian High Pressure system is expected to remain constant at central pressure value of 1020hpa, during the forecast period, according to the GFS model.

The central pressure value of the Mascarene high pressure system over the Southwestern Indian Ocean is expected to weaken from central pressure value of 1037hpa in 24hours to 1035hpa in 120hours, according to the GFS model.

The St Helena high pressure system over the Southeast Atlantic Ocean is expected to weaken from a central pressure value of 1030hpa in 24hours to 1027hpa in 120 hours, according to the GFS model.

At 925Hpa level, easterly and north-easterly wind (>20kts) is expected to prevail across much of the African countries through 24 to 120 hours while the intensity of the wind tends to weaken across the North, central, Northeastern regions of Africa, while remaining moderately strong across Northwestern Africa towards end of the forecast period, according to the GFS model.

At 850Hpa level, Easterly and North-Easterly wind over North and West African countries, Easterly and South Easterly wind over East, Central and southern African countries, is expected to prevail across in these Region, While wind convergence is expected to remain active in Mali, Nigeria, Cameroon, CAR, Sudan and Ethiopia during the forecast period, according to the GFS model.

At 700hpa level, a trough associated with mid-latitude frontal system is expected to prevail across North and Northeast African countries. Easterly wind over west, East and Central African countries, Southeasterly winds over Southern African countries, is

expected to prevail across in these Regions, during the forecast period, according to the GFS model.

At 500Hpa level, a trough associated with mid-latitude frontal system is expected to prevail across North and Northeast African countries. Easterly wind is expected to prevail across West, Central and East African countries. While Westerly wind over Southern African countries, is expected to prevail across in these regions, during the forecast period, according to the GFS model.

In the next five days, lower-level wind convergence over Mali, Nigeria, Car, Cameroon, Sudan, and Ethiopia, is expected to enhance rainfall in these regions. There is an increased chance for heavy rainfall over Sierra Leon, Liberia, Congo Brazzaville, Rwanda, Cameroon, Gabon, Burundi, Kenya and Ethiopia.

2.0. Previous and Current Day Weather Discussion over Africa

(May 14, 2015 – May 15, 2015)

2.1. Weather assessment for the previous day (May 14, 2015)

Moderate to heavy rainfall were observed across Liberia, Ivory Coast, Benin, Togo, Southern Chad, CAR, Nigeria, Cameroon, DRC, .South Sudan and Ethiopia.

2.2. Weather assessment for the current day (May 15, 2015)

Intense convective deep clouds are observed over Nigeria, Gabon, Congo Brazzaville, DRC, Cameroon, CAR, Somalia, South Sudan and Ethiopia.
