

## The USAID FEWS NET Weather Hazards Impacts Assessment for Afghanistan August 25 - 31, 2010

### Temperatures:

During late July, temperatures averaged at or below normal. The cooler temperatures were a result of an increase in low-level moisture, associated with the Indian Monsoon. During August, temperatures have averaged at or above normal as low-level moisture gradually decreased. During the next week, temperatures are forecast to average near normal. Maximum temperatures are expected to exceed 40 degrees C in southwest Afghanistan.

### Precipitation

During the latter half of July and early August, heavy rain has triggered deadly flooding in the Peshawar valley of northwest Pakistan and damaged crops in Pakistan. Flooding was also reported along the northeast border areas of Afghanistan, including in the Paktya and Day Kunki provinces. The intensity of rainfall has diminished during the past two weeks. The more widespread, heavy rainfall has shifted east into India. During the next week, seasonal dryness is expected across Afghanistan.

**Note: The Hazards assessment map is based on current weather/climate information, short and medium range weather forecasts (up to 1 week), and assesses their potential impact on crop and pasture conditions. Shaded polygons are added in areas where anomalous conditions have been observed. The boundaries of these polygons are only approximate at this continental scale. This product does not reflect long range seasonal climate forecasts or indicate current or projected food security conditions.**

FEWS NET is a USAID-funded activity whose purpose is to provide objective information about food security conditions. Its views are not necessarily reflective of those of USAID or the U.S. Government. The FEWS NET weather hazards assessment process and products include participation by FEWS NET field and home offices, NOAA-CPC, USGS, USDA, NASA, and a number of other national and regional organizations in the countries concerned. Questions or comments about this product may be directed to [Wassila.Thiaw@noaa.gov](mailto:Wassila.Thiaw@noaa.gov) or 1-301-763-8000 x7566. Questions about the USAID FEWSNET activity may be directed to Gary Eilerts, USAID Program Manager for FEWSNET, 1-202-219-0500 or [geilerts@usaid.gov](mailto:geilerts@usaid.gov).
