

Climate Prediction Center's Central Asia Hazards Outlook For USAID / FEWS-NET May 09 –15, 2019

Temperatures:

During the past week, temperatures averaged 2 to 8 degrees C above normal throughout parts of northern and western Kazakhstan, with average to slightly below average temperatures observed across Afghanistan Iran and Pakistan. Maximum temperatures are forecast 6 to 15 degrees C above normal across northern Afghanistan, north Pakistan and eastern Uzbekistan. Maximum temperatures may reach above 8 degrees C above normal across the Western part of Kyrgyzstan.

Precipitation

During the last seven days, a continuation of seasonal precipitation was received across many local areas in northern Kazakhstan. The highest weekly rainfall accumulations (>50mm) were observed in southern Kazakhstan, south-east Uzbekistan, western Tajikistan, and Kyrgyzstan extending across northern Pakistan. For the upcoming outlook period, a continuation of average to above-average rainfall is expected across the middle and north east Afghanistan, the east belt and northern part of Pakistan, with the potential for highest rainfall accumulations forecast over Tajikistan and Kyrgyzstan during the next seven days.

Note: The Hazards outlook map is based on current weather/climate information, short and medium range weather forecasts (up to 1 week), and assesses their potential impact on crop and pasture conditions. Shaded polygons are added in areas where anomalous conditions have been observed. The boundaries of these polygons are only approximate at this continental scale. This product does not reflect long range seasonal climate forecasts or indicate current or projected food security conditions.

FEWS NET is a USAID-funded activity whose purpose is to provide objective information about food security conditions. Its views are not necessarily reflective of those of USAID or the U.S. Government. The FEWS NET weather hazards outlook process and products include participation by FEWS NET field and home offices, NOAA-CPC, USGS, USDA, NASA, and a number of other national and regional organizations in the countries concerned. Questions or comments about this product may be directed to Wassila.Thiaw@noaa.gov or 1-301-683-3424. Questions about the USAID FEWSNET activity may be directed to Gary Eilerts, USAID Program Manager for FEWSNET, 1-202-254-0204 or geilerts@usaid.gov.
