

Climate Prediction Center's Central Asia Hazards Outlook For USAID / FEWS-NET July 25 –31, 2019

Temperatures:

Since several weeks, the northern part of Kazakhstan has been covered by abnormal dryness. Observed maximum temperature anomaly reached over 8 to 12 degree C throughout western Uzbekistan, western Turkmenistan, and small portion of western Tajikistan. Normal to slightly above-normal mean temperatures are expected over most of Central Asia during the next week except the eastern part of Turkmenistan going eastward through northern Afghanistan and southern Tajikistan including northern Pakistan. Same pattern has been seen over the northern frontier of Uzbekistan with south Kazakhstan and west Kyrgyzstan, with maximum temperature possibly exceeding 45 degrees Celsius over Turkmenistan and northern Afghanistan.

Precipitation

During the last seven days, northern and central Pakistan has received the seasonal rain in the portion of northern part exceeding 300 mm. For the upcoming outlook period, a continuation of light rain is expected across the far eastern Afghanistan throughout central Pakistan. Heavy rain exceeding 300 mm has been predicted in local area of northern Pakistan. The northern Kazakhstan will receive light to moderate rain for the coming week.

Note: The Hazards outlook map is based on current weather/climate information, short and medium range weather forecasts (up to 1 week), and assesses their potential impact on crop and pasture conditions. Shaded polygons are added in areas where anomalous conditions have been observed. The boundaries of these polygons are only approximate at this continental scale. This product does not reflect long range seasonal climate forecasts or indicate current or projected food security conditions.

FEWS NET is a USAID-funded activity whose purpose is to provide objective information about food security conditions. Its views are not necessarily reflective of those of USAID or the U.S. Government. The FEWS NET weather hazards outlook process and products include participation by FEWS NET field and home offices, NOAA-CPC, USGS, USDA, NASA, and a number of other national and regional organizations in the countries concerned. Questions or comments about this product may be directed to Wassila.Thiaw@noaa.gov or 1-301-683-3424. Questions about the USAID FEWSNET activity may be directed to Gary Eilerts, USAID Program Manager for FEWSNET, 1-202-254-0204 or geilerts@usaid.gov.
