

The USAID FEWS-NET

Haiti Weather Hazards Assessment

for **July 21 - 27, 2005**

Hispaniola has now twice avoided major impacts from a passing hurricane. This past week Hurricane Emily maintained a course that kept the storm just to the south of the island. The forecast for the upcoming week calls for occasional showers. Any moderate rainfall looks to be confined to very early in the period over the southern and eastern portions of the Dominican Republic.

FEWS NET is a USAID-funded activity whose purpose is to provide objective information about food security conditions. Its views are not necessarily reflective of those of USAID. The FEWS NET weather hazards assessment process and products include participation by FEWS NET field and home offices, NOAA-CPC, USGS, NASA, and a number of other national and regional organizations in the countries concerned. Questions or comments about this product may be directed to Alvin.Miller@noaa.gov or 1-301-763-8000 x7552
